

**PUBLIC NOTICE**  
**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Monitoring Requirements Not Met for**  
**Waterfall Community WUA**

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

Our water system violated drinking water requirements on February 28, 2023. We were notified on May 01, 2023 that a secondary violation (Disinfection Residual Monitoring and Reporting) was issued. Even though this was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. On February 28, 2023, we incurred a Disinfection Residual Monitoring and Reporting Violation.

**What should you do?** There is nothing you need to do at this time.

**What does this mean?** One requirement of the public water systems is the periodic monitoring of tap water for bacterial contaminants. On February 28, 2023, we did not provide a sample for Disinfection Residual Monitoring and Reporting. Therefore, we cannot be sure of your drinking water during that time.

**What happened? What is being done?** A routine sample was not collected on February 28, 2023. The failure to submit a water sample incurred a violation for Disinfection Residual Monitoring and Reporting. Public notice has been mailed to all members, posted to WCWUA message centers, and to [wcwua.org](http://wcwua.org).

Date the system is expected to come back into compliance: March 05, 2023.
