Revision: 1

Table of Contents

Section 1: Emergency Response Mission and Goals

Section 2: System Information

Section 3: Chain of command - lines of authority

Section 4: Events that cause emergencies

Section 5: Severity of Emergencies

Section 6: Emergency Notifications

Section 7: Water Quality Sampling

Section 8: Effective Communication

Section 9: The Vulnerability Assessment

Section 10: Response Actions for Specific Events

Section 11: Alternative Water Sources

Section 12: Curtailing Water Usage

Section 13: Returning to Normal Operations

Section 14: Training and Rehearsals

Revision: 1

Section 1: Emergency Response Mission and Goals

Mission statement for emergency response	In an emergency, the mission of the Waterfall Community WUA water system is to protect the health of our customers by being prepared to respond immediately to a variety of events that may result in contamination of the water or disruption of supplying water.
Goal 1	Be able to quickly identify an emergency and initiate timely and effective response action.
Goal 2	Be able to quickly notify local, state, and federal agencies to assist in the response.
Goal 3	Protect public health by being able to quickly determine if the water is not safe to drink or use and being able to immediately notify customers effectively of the situation and advise them of appropriate protective action.
Goal 4	To be able to quickly respond and repair damages to minimize system down time.

Revision Date: 08/9/24

Revision: 1

Section 2: System Information

Public Water System identification number (PWSID #)	NM35-643	. 19	
System name and address	Waterfall C	Community W	ater Users
Directions to the system	NM Highwa on Lakevie on Lodge S waterfall, to Rd., drive b	w Dr.; at Stop Spring Rd. At urn left into 56	miles, turn left sign, turn left top of Lodge Spring use to the rock
Basic description and location of system facilities	water source pumps to 4 psi. Tank sone 3K., whose system for	-tanks at ~15	house which to 25 gpm/20 K, two 5K and distribution ons, and is
Location/Town	A SECURE OF THE RESIDENCE OF THE PROPERTY OF T	oudcroft, NM	JA is 6.5 miles on NM
Population served and service connections	People	Cor	nnections 127
System owner (the owner should be listed as a person's name)	WCWUA, F	President/Boa	rd of Directors
Name, title, and phone number of person responsible for maintaining and implementing the emergency plan	Name Ray Martinez	Title Small Water Operator	Phone 575-921-7931

Revision: 1

Section 3: Chain of command – lines of authority

Name and title	Responsibilities during an emergency	Phone Number(s)
Ray Martinez, Small Water Operator	To assess the situation, determine if the water is safe for public usage, or determine a threat to the system infrastructure. When needed, take samples and resume the water system to normal operations	575-921-7931
Todd Cooper	President, Board of Director	575-921-2664
Robert Cox	Board Member	575-682-1318

Section 4: Events that cause emergencies

Type of event	Probability or risk (High-Med-Low)	Comments
Loss of Water	High	Contamination from outside source
Power Outage	High	Lighting or obstruction of power
Water Line breakage	Medium	Due to wear and tear or damage to line
Vandalism	High	Intrusion to well and tank property

Description:

Revision: 1

Section 5: Severity of Emergencies

Communicate each assessment of severity immediately to all those dealing with the emergency. Cell phone overage may be limited; radios should be used when in the field.

Level I - No Water Description: Determine reason for no water, such as pump went out, power outage or line break. Level II - Vandalism Description: potential contamination to water source or tank; interrupting flow by manipulating equipment Level III – (Definition) Description: Level IV -(Definition) Description: Level V – (Definition)

Revision Date: 08/9/24

Revision: 1

Section 6: Emergency Notifications

Immediate assistance is reported to 9-1-1

Local contacts

Entity	Phone Numbers (Both Day and Night)
Local Law Enforcement	575-437-2210
Fire Dept	575-437-2210, 911 preferred
Ambulance service	575-437-2210, 911 preferred
Local Health Jurisdiction	N/A
Water Testing Laboratory	D & T Center, Alamogordo, NM 575-434-4944 Hall Tech., Albuquerque, NM 505-345-3975
Local emergency management	N/A
Water System Operator	575-921-7931
Neighboring Water System	N/A
News Media Contact	N/A
Local Radio Station	

State Notification

Entity	Phone Numbers (Both Day and Night)
State Police	575-437-1313
Drinking Water Bureau	575-915-1113
State Testing laboratory	Diagnostic & Technology Center/Alamo 575-434-4944

Revision: 1

Service/Repair notification

Entity	Phone Numbers (Both Day and Night)
Electrician	YHWH Electrical Service Inc. 575-682-1316
Electric Utility	OEC 575-682-2521
Plumber	N/A
Pump Specialist	Statewide Drilling 575-437-8984
Soil Excavator	General Hydronics 575-437-6512

Water system customers notification

Who is Responsible:	WCWUA/Board of Directors
Procedures:	Waterfall WUA will contact the customers through email, phone, door to door

Alert local law enforcement, state drinking water officials, and local health

Who is Responsible:	Todd Cooper, President	
Procedures:	Will make calls to officials on the list	

Contact service and repair contractors

Who is Responsible:	Ray Martinez, Water System Operator
Procedures:	From the emergency list, call the proper entity to respond in a timely manner

Revision Date: 08/9/24 Revision: 1	
Contact neighboring water sy	stems, if necessary
Who is Responsible:	N/A
Procedures:	N/A
Procedures for issuing a heal Who is Responsible:	th advisory Chris Burton
Procedures:	TBD
Other procedures, as necessa	ary
Who is Responsible:	N/A
Procedures:	

Revision: 1

Section 7: Water Quality Sampling

If contamination is suspected, notify and work with the local health jurisdiction and NMED Drinking Water Bureau to help identify what testing should be done. This may help prevent illness or even death.

Water quality sampling

Sampling parameter	Do we have procedures? Yes/No	Basic steps to conduct sampling (sites, frequency, procedures, lab requirements, lab locations, contacts, etc.)
Coliform Bacteria	Y	One routine sample per month per DSSP
Heterotrophic Plate	N	
Count (H PC)	N	
Chlorine Residual	Υ	TBD
Chlorine Demand	Υ	
Nitrate/Nitrite	Υ	One routine sample yearly
Total Organic Carbon (TOC)	N	
Total Halogenated Organic Carbon (TOX)	N	
Cyanide	Y	One routine every six years

Revision: 1

Section 8: Effective Communication

Spokesperson: Chris	Alternate: Deana	Alternate 2
Burton	Thedford	

Key message:

The Waterfall Community Water Users Association is aware of the situation and is
currently addressing the problem with the assistance of local and state officials.
Service will resume normal operations as soon as safe. Everything possible is being
done to return water to the Waterfall community. The Board of Directors and
members extend our thanks to the officials and community vendors who are helping
all of us. Further updates will be provided when the situation changes.

Health advisories

These advisories are issued when the health risks to the consumers are sufficient, in the estimation of the water system or state or local health officials, to warrant such advice.

Revision: 1

Section 9: The Vulnerability Assessment

Facility vulnerability assessment and improvements identification

System component	Description and condition	Vulnerability	Improvements or mitigating actions	Security improvements
Source	1 spring inside pump house	Med		Fence around area
Storage	4 tanks	Med		Fence around area
Treatment	Chlorine	Low		
Pump house and pumping facilities	Locked Building	Low		
Computer and telemetry system	Computer in locked building, Telemetry located on roof of building & on top of tank	Low		
Other considerations				

Revision: 1

Section 10: Response Actions for Specific Events

1. Confirm and analyze the type and severity of the emergency.

- 2. Take immediate actions to save lives.
- 3. Take action to reduce injuries and system damage.
- 4. Make repairs based on priority demand.
- 5. Return the system to normal operation.

The following tables identify the assessment, set forth immediate response actions, define what notifications need to be made, and describe important follow-up actions.

A. Power outage

Assessment	Determine the reason for the outage
Immediate actions	Call proper entity per emergency list
Notifications	Call the authorities to update them and customers to notify them
Follow-up actions	Call customers and authorities to update. Ensure system is back in service

B. Transmission or main break

Assessment	Call proper services per emergency list and repair or replace the line
Immediate actions	Turn off the water and isolate the water break and repair or replace the line
Notifications	Make calls or door to door contact to inform of situation
Follow-up actions	To make sure system is back to normal operation and take sample to laboratory

Revision: 1

C. Distribution line break

Assessment	Same as above
Immediate actions	
Notifications	
Follow-up actions	

D. Chlorine treatment equipment failure

Assessment	Determine the problem
Immediate actions	Repair or Replace faulty equipment and bring system back into operations
Notifications	
Follow-up actions	

E. Treatment equipment

Assessment	N/A
Immediate actions	
Notifications	
Follow-up actions	

Revision: 1

F. Source pump failure

Assessment	Determine the reason for failure
Immediate actions	Call the proper service per emergency list and correct the problem in a timely and safe manner
Notifications	Call proper authorities and customers to notify of situation
Follow-up actions	To ensure the system is back to normal operation and the water is safe to consume. Sample test

G. Microbial (coliform, E. coli) contamination

Assessment	Determine the cause and location of contamination
Immediate actions	Follow the DSSP procedures
Notifications	Follow the procedure per DSSP
Follow-up actions	Follow the proper steps according to the DSSP and State recommendations.

H. Chemical contamination

Assessment	N/A
Immediate actions	
Notifications	
Follow-up actions	

Revision: 1

I. Vandalism or terrorist attack

Assessment	To investigate the attack or vandalism		
Immediate actions	Follow the procedure on the ERP		
Notifications	Call the proper authorities on the emergency call list		
Follow-up Make sure the situation was approached and corrected actions proper steps and the water is safe to consume			

J. Reduction or loss of water in the well

Assessment	Determine the reason for the loss in the well	
Immediate actions	Call the proper service personal and determine the correct of action to correct the situation	
Notifications	Call authorities and customers per emergency list	
Follow-up actions	Make sure system is back to normal operation	

K. Drought

Assessment	Look at different ways to ration water		
Immediate actions	To ration water by limited usage		
Notifications	Call customer to conserve water		
Follow-up actions	Ensure plan is working till drought is over		

Revision: 1

L. Flood

Assessment	Possibility			
Immediate actions	To shut off wells			
Notifications	Let customers know to limit water usage and call authoritie			
Follow-up actions	To correct the situation from flooding again			

M. Earthquake

Assessment	N/A
Immediate actions	
Notifications	
Follow-up actions	

N. Hazardous materials spill in vicinity of sources or system lines

Assessment	Assess the possible contamination	
Immediate actions	Protect the well and system by determining the problem and taking the correct action, shutting down well, closing valves, et.	
Notifications	Call proper authorities per emergency call list	
Follow-up actions	To ensure the quality of water is safe and turn everything back to normal conditions	

Revision Date: 08/9/24

Revision: 1

O. Electronic Equipment Failure

Assessment	Check why failure occurred		
Immediate actions	Call out proper services and correct the situation		
Notifications	Notify proper authorities and customers of situation		
Follow-up actions	To ensure normal operation of the equipment		

P. Cyber attack

Assessment	N/A
Immediate actions	
Notifications	
Follow-up actions	

Q. Other

Assessment	
Immediate actions	
Notifications	
Follow-up actions	

19

Revision Date: 08/9/24

Revision: 1

Section 11: Alternative Water Source

Inter connect to adjacent water supply system

N/A				-	

Alternate source(s) of water

Alternative sources	Name	Phone	Availability	Is the water safe for drinking?
Bottled Water	Store		Yes	Yes
Water Hauling	Oasis	575-437-3820	Yes	Yes

Section 12: Curtailing Water Usage

Water curtailment measures	Actions
During drought or water outage	Limit water usage until problem is corrected

Section 13: Returning to Normal Operations

Action	Description		
Repair or replace the problem and bring the system back to normal and safe conditions	Notify the customers of any changes or updates		

Revision Date: 08/9/24

Revision: 1

Section 14: Training and Rehearsals

Identify staff position training needs and expectations.				
Position	Training needs and expectations			
Operator	Keep the Certification level updated according to state regulations			
Field support				
Administrative support				

20

Emergency rehearsals

Schedule for drills, tabletop exercises, and other ways to practice emergency response:

Event	Description	People and organizations involved	Date
N/A			

Section 15: Plan Approval

This plan is officially in effect when reviewed, approved, and signed by the following people:

Name/Title	Signature	Date	
Todd Cooper/ President	2	8/9/24	
Chris Burton/ Vice President	attelle	8/9/24	
Robert Cox/ Treasurer	W. Robert Cox	8/9/24
